2. Gather Information

Compile all your product info such as brand names, part numbers and compatible vehicles.

3. Edit or Create A New Listing

Edit an existing listing or create a new listing with parts compatibility. Use our catalog, if available, or include compatible vehicles manually.

4. Review Listing

Confirm your compatible vehicles in the compatibility section of your new listing and replace your previous listing with a parts compatibility listing. Your listing will show up when buyers search these terms.

5. Finish Listing as Usual

From here, you can continue to work through your listing.

BEST LISTING PRACTICES

How can I optimize my parts compatibility listings?

It's important to keep your listings simple and organized, so that your listings stand out to buyers.

Follow these best listing practices to most efficiently create your parts compatibility listings and to provide an optimized experience for buyers, which will help you drive sales. The results from following these guidelines will ultimately make for happy buyers and happy sellers!

- 1. Use our catalog** by choosing from over 11 million products when creating your listing. This method will automatically populate your listing with compatible vehicles and will update car year, make and model information when new vehicles are released.
- 2. Add your own list of compatible vehicles** if your product isn't in the catalog. You can manually include your own list of up to 3,000 compatible models. Create one listing per product and add all compatible vehicles to that listing.
- 3. If the Manufacturer Part Number fits more than 3,000 vehicles,** you can list multiple items of that MPN. Fitment does need to max out at 3,000 before moving to a new listing. A seller can have up to 5 listings in these situations.
- 4. Use your 80 character title wisely** by focusing on search elements like brand names, part numbers and product features. Including compatible vehicle information in your title will not increase your exposure in buyer searches.
- 5. Choose a listing tool that supports parts compatibility.** Our eBay tools support compatibility and so do numerous third party providers. Check our compatibility page to find out which tools can help you get started!
