The Inside Story of the EcoSphere® The Original EcoSphere® is the world's first totally enclosed ecosystem - a complete, self-contained and self-sustaining miniature world encased in glass. Be wary of inferior and lower quality imitations.

Easy to care for, an EcoSphere is an incredible learning tool that can provide powerful insights about life on our own planet... and provide a glimpse of technology that's shaping the future of space exploration. Inside each EcoSphere are active micro-organisms, small shrimp, algae and bacteria, each existing in filtered sea water. Because the EcoSphere is a self-sustaining ecosystem, you never have to feed the life within. Simply provide your EcoSphere with a source of indirect natural or artificial light and enjoy this aesthetic blend of art and science, beauty and balance. Because the living organisms within the EcoSphere utilize their resources without overpopulating or contaminating their environment, the EcoSphere requires virtually no maintenance. But an Ecosphere® is much more than a scientific breakthrough - it is a work of art. A living treasure to own or give to someone special. Each EcoSphere is carefully crafted to achieve an aesthetic, meditative beauty that can soothe any environment, including home, classroom or office. Our ecosystems demonstrate in a most simplistic way the interdependence of animal and plant life with Earth's most precious element - water. The EcoSpheres have been called science projects, the world's lowest maintenance pets, or closed aquariums. They are in fact developments of space age technology initiated by NASA.
