

Light & Dark Productions

Light & Dark Productions is an independent horror movie company. Our current titles include Fear of the Dark and The Tenement (currently distributed by Brain Damage Films).

In order to maintain our position in the industry, we ask that you purchase only original authorized copies of our products. Movie piracy not only hurts those who made the film but you as the viewing audience as well. We rely on the profits in order to fund our projects. No money coming in means no new movies for you to enjoy.
