

MECOA
Model Engine Corporation of America

Model Engine Corporation of America (MECOA), along with its precursor RJL Industries (founded in 1980 by Randy Linsalato), has been a significant presence in the hobby industry. RJL Industries established MECOA in 1993.

Over the decades, MECOA and RJL Industries have solidified their market position by acquiring numerous companies and brand names, estimated to be nearly 50. Some of these include well-known brands such as K&B, Cox, Fox, Webra, HB, HP, and Fuji.

MECOA is committed to protecting its valuable brand identity and intellectual property. The company's names, logos, and owned brands are trademarks of Model Engine Corporation of America or its affiliates. Unauthorized use of these trademarks violates U.S. Trademark Laws. MECOA's websites also display copyright notices for their web content and creative works, underscoring their dedication to safeguarding all intellectual property rights, including trademarks, service marks, and copyrights related to their business and products.

MECOA actively defends its intellectual property rights and will pursue any infringement. This includes monitoring online platforms like eBay and notifying them of unauthorized trademark use or counterfeit merchandise.

To prevent trademark infringement:

- Products not manufactured by MECOA or its affiliated brands must not use any MECOA trademarks.
- Items intended for use with MECOA products but not genuine MECOA or affiliated brand products must be clearly identified as 'reproduction,' 'aftermarket,' or with similar wording indicating they are not made by MECOA or its brands. Such items must not bear MECOA trademarks.

All literature, manuals, instruction sheets, plans, and other documents created by MECOA or its brands are protected by copyright. Reproducing and selling these materials without explicit authorization from MECOA constitutes copyright infringement. Furthermore, all images and text on MECOA and affiliated websites are copyright protected and cannot be used without MECOA's explicit written permission. The likenesses of models in its photographic images are also protected against unauthorized use through rights of publicity and privacy.
