

About Us:

SockDock® is a sock laundry and organizing tool invented by our founder, Kevin Bunn and recognized under US Patent No. D807060 and US Trademark No. 4421186. SockDock® was created out of necessity because socks for a family of four was almost impossible to match.

SockDock® is a simple & easy-to-use sock laundry & organizing tool designed to keep socks in pairs while washing, drying and storing, so you never have to sort, match or search for socks EVER again! It's the only sock loss prevention AND storage system on the market.

How it works:

Hang one SockDock® on a dirty clothes hamper, door knob, or closet rod.

1. Starting at the bottom, place one pair of dirty socks between 2 sliders, and adjust top slider down to socks.
2. Once full of socks, remove the hanger and toss the SockDock® in washer, then dryer
3. Hang SockDock® with clean socks in closet

Features & Benefits:

- * Wash, dry & store socks
- * Sold in pairs – one for clean socks, one for dirty socks
- * Each SockDock® holds 9 pairs of socks
- * Works with any size socks (baby – adult)
- * Washer-safe, dryer-safe (certified by Bureau Veritas Laboratories)
- * Cord will not fade or bleed
- * Also works with headbands, gloves, hats, scarves, undergarments, & onesies
- * Saves time, money & relationships

Don't be fooled by fakes...

We are aware of counterfeits in the marketplace. To avoid purchasing a counterfeit product, we always recommend purchasing through an authorized vendor that you can find on our website at www.sockdock.com. If you would like to become a SockDock® vendor, please contact us at sales@sockdock.com

To be certain you are purchasing an authentic SockDock®, first check for our Trademark logo on the heel of the foot shaped hanger. Also, there should be 2 SockDocks in each package. Also, make sure the SockDock "S" is engraved on each buckle on the SockDock®. Next make sure it was purchased

directly from www.sockdock.com or an authorized dealer from our list located on our home page. Lastly, you can spot the difference in quality because the buckles are not strong enough to hold socks while in the washer and dryer....so the socks fall out. Also, the end clips of the counterfeit are the wrong size and fall off. The counterfeit uses a basic shoe string instead of paracord coated in a special non-bleeding treatment. Therefore, the counterfeit will bleed onto your clothes and ruin them — the phonies are no substitute!

SockDock LLC is dedicated to stopping all counterfeits, but we ask you the public to not support counterfeit purchasing. Our team is working with law enforcement agencies and online marketplaces to stop the distribution and manufacturing of our Intellectual Property.

Consequences of infringements include:

- Reporting of infringements to online market places to have the item removed.
- We reserve the right under US Patent laws to take legal action if infringement is not resolved and item listing is not removed immediately.
- We reserve the right to report infringements regarding DMCA violations that mislead consumers to counterfeit items.
- We reserve the right to report infringements to the appropriate US Law enforcement agencies and any other agencies that handle IP right protection

To avoid infringement possibilities with our company make sure the good/item related to a "sock laundry and organizing tool" is authenticate with our "SockDock" logo. Kevin Bunn (inventory of the SockDock®) is the registered inventor of said product, we are the sole manufacturer of said product and any product that functions as said product is a violation under IP laws.

If you have any general questions or if you unsure about authenticity of your SockDock®, please contact us at sales@sockdock.com

Thank you,

Kevin Bunn (SockDock® inventor)
