

United Real Estate Media

United Real Estate Media™ is the maker of the United Real Estate Media family of software, book and eBook products (see **Our Product Brands** below). These products were designed from the ground up to allow professional licensees and students a more simplistic form of study for their professional licensing exams. It is the first educational exam study on the market designed to fill the gap between formal education and the actual test taking experience; so that examinees can obtain the key materials needed to pass their exams on the first try. Created by professional exam proctors and attorneys in their respective fields of study such as real estate law, construction, nursing, medicine, and other various state licensing curriculums. We have created exam simulations and study material that are effective with the highest of results.

Software Piracy

Our software and publications contain an End User License Agreement ("EULA") and by receiving and or using our products, the end-user agrees to the terms and conditions of the EULA. The EULA specifically excludes the rights to redistribute our products. Our Software must be purchased through our company or through a licensed reseller to be properly licensed and available for use royalty-free. Illegal distribution of products can subject a seller to arrest and felony charges with fines up to \$250,000 and prison terms of up to 5 years. In civil litigation against infringers trafficking in United Real Estate Media products that are illegally distributed or reproduced, United Real Estate Media can obtain the higher of its lost profits, the infringer's profits, or statutory damages of up to \$100,000 per product, per infringement, in addition to recovery of United Real Estate Media's attorneys' fees in the action. Apart from legal consequences, using pirated copies of our Software also means greater exposure to viruses; corrupt disks, or otherwise defective software; and invalid serial numbers; lack of technical product support available to properly licensed users; and ineligibility for software upgrades offered to properly licensed users.
